---

## PROFESSIONAL SUMMARY

Enthusiastic and self-motivated Junior Flutter Developer with strong foundational knowledge in Flutter and Dart. Skilled in building cross-platform mobile applications with clean UI and smooth user experiences. Familiar with RESTful APIs, Firebase, Git, and app lifecycle management. Eager to learn, grow, and contribute to high-quality mobile app development within a collaborative team environment.

---

## TECHNICAL SKILLS

**Languages & Frameworks:** Dart, Flutter, VB.NET, .NET Framework, Java, HTML5, CSS3

**Mobile & Desktop Development:** Flutter (cross-platform), WinForms

**Databases:** Firebase (basic), SQL Server, MongoDB, MySQL

**Tools:** Git, GitHub, Postman, Axios

**Others:** RESTful APIs, OOP, Basic State Management, Version Control (Git)

---

## EDUCATION

**B.E CSE** – Dr.G.U.Pope college of Engineering, Sawyerpuram, 2021–2025

---

## EXPERIENCE

**Full Stack Developer Intern**– Relaxplzz Technologies • April 2025 – August 2025

- Built responsive, user-friendly web interfaces and improved overall UI/UX, gaining strong understanding of layout design that translates well into mobile app development.
  - Integrated frontend and backend functionalities using Axios for seamless client-server communication.
  - Collaborated with senior developers and contributed to an internal application, strengthening skills in component-based architecture, state management, and modular coding — core concepts in mobile development as well.
-

## PROJECTS

### **Weather App using Flutter and REST API**

Created a weather forecast app that fetches live weather data by city name and displays temperature, weather conditions, and icons.

*Skills:* Flutter, Dart, REST API, JSON, HTTP Package.

### **Firebase Auth Demo App**

Developed a simple authentication app with email/password login and sign-up, along with form validation and navigation.

*Skills:* Flutter, Dart, Firebase Auth, Form Validation, Navigation.

### **Flutter To-Do App**

Built a mobile app to manage daily tasks, allowing users to add, delete, and mark tasks as complete with local state management.

*Skills:* Flutter, Dart, Stateless/Stateful Widgets, ListView

### **Recipe Finder App**

Created a recipe search app that fetches data from an API based on ingredients entered by the user and displays cooking instructions.

*Stack:* Flutter, Dart, REST API, JSON Parsing, HTTP Package
